Residential Water Service Review Form

OFFICE USE ONLY	
Date:	
Permit #:	

Permit Address:	
Type of Construction:	

The Village of Barrington has been mandated by the Illinois Department of Public Health to review all permits with plumbing work, to enforce compliance with the Illinois Plumbing Code minimum water service and water meter sizes. **All permits requiring plumbing work must be accompanied by this form.**

The permit applicant must provide the existing sizes of the water meter and the water service line from the street to the water meter. Plumbing fixtures, **both existing and new**, must be listed in the "Number of Fixtures" column. The Illinois Plumbing Code determines the required minimum water service line size and water meter size. If it is determined that a larger water service line or larger water meter is required per code, the property owner/agent for property owner is responsible for the cost of installation from the water main in the street to inside the building structure and any associated increased tap fees, as determined by Village ordinance. The Village supplies and installs the upgraded water meter, as part of the fees paid. The installation of a new water service line, if required, is the responsibility of the property owner/ agent for property owner.

FIXTURE TYPE	TOTAL NUMBER OF FIXTURES	VALUE PER FIXTURE	TOTAL FIXTURE UNITS
