19. MOVING BUILDINGS

Moving buildings is generally considered a last resort to demolition and should be considered only if other means of preservation have failed. If a pre-1939 dwelling within or outside a locally designated district is threatened with demolition, it is appropriate to move the dwelling to one of the District's vacant lots for rehabilitation. A building moved into the Historic District should respect the front and side yard setbacks, orientation, and foundation heights of the neighboring properties.

A. into the Historic District may be appropriate if compatible with the District's architectural character through style, period, height, scale, materials, setting, and placement on the lot.

B. that contribute to the historic and architectural character of the District should be avoided unless demolition is the only alternative.
