ADDENDUM 02
FOR
CENTRAL BUSINESS DISTRICT STREETSCAPE AND PEDESTRIAN IMPROVEMENTS
VILLAGE OF BARRINGTON, IL

Date of Addendum: Thursday, July 13, 2023

Bid Due Date: 10:00 AM Friday, July 21, 2023

Description of Addendum:

The following items provide additional clarification and modifications to the request documents and are made a part of the bid documents for the Village of Barrington's 'CENTRAL BUSINESS DISTRICT STREETSCAPE AND PEDESTRIAN IMPROVEMENTS' It is the submitter's responsibility to review all bid documents thoroughly in preparation of their submittal.

Additionally, this addendum shall be attached to the bid proposal and if not, the bid may be disqualified.

Q1. The RFQ references Phase I and Phase II Engineering Services. Is it the intention of the Village to have an IDOT Phase I Project Development Report prepared in Phase I or is the Village indicating that this is just Part 1 of the overall project?
A: An IDOT Phase I Project Development Report will not be required as part of the first phase of this work. However, due to large portions of the project area being within IDOT rights of way, typical IDOT Phase I and II permitting, reports and clearances may need to be coordinated in the second phase of the Village's work as projects identified in the first phase are selected for design and construction within these rights of way.
Q2. The RFQ references land acquisition services. Would that only be part of Phase II or other future phases of the project?
A: Land acquisition would only be part of any Phase II work and as needed.
Q3. In the "Project Need" section of the RFQ it states, "Each block will need to be analyzed and existing conditions documented as a basis for proposing optimal, cost-effective improvements." However, in the "General Scope of Work" section it is not stated that existing conditions need to be documented. Will the Village provide existing conditions, or will the selected consultant perform the necessary field work to document the condition of the existing pavers?
A: The selected consultant will be expected to perform the necessary field work to document existing conditions, as this is intended to be the basis for proposing optimal, cost-effective improvements.
Q4. Does the Village wish to analyze ADA compliance as part of Phase I of the project? If so, should the selected consultant plan to perform the field work?
A: The intent is not to have a formal survey, but determine if there may be areas that will need additional consideration to insure ADA compliance is met with any future improvements. Visual and laser level inspection will be sufficient for Phase I.
