**Village of Barrington Receives APWA Excellence in Snow and Ice Control Award**

BARRINGTON, IL (Feb. 21, 2025) – The Village of Barrington is pleased to announce it has been named a recipient of the prestigious American Public Works Association (APWA) Excellence in Snow and Ice Control Award for 2025. Barrington is one of only 11 agencies in Illinois and 45 agencies across North America to receive this distinguished recognition since the program began in 2008.

The APWA Excellence in Snow and Ice Control Award celebrates agencies that demonstrate exceptional management and execution of snow and ice operations, adhering to best practices in snow removal while minimizing environmental impacts.

It is the second time Barrington's Director of Public Works, Fred Braun, has led a department that has earned this honor. Previously, he received the same award while serving as Director at the Village of Niles. Braun's commitment to excellence and leadership is supported by a dedicated team that continually strives for the highest standards in every project they undertake.

The Village of Barrington provides snow and ice removal services for a vast array of assets, ensuring the safety and mobility of its residents during the winter months. The Village's snow and ice control program covers more than 45 lane miles of Village streets; 5.6 lane miles of highways owned by the Illinois Department of Transportation (IDOT) under a maintenance agreement; 24 parking lots; 44 alleys; 81 cul-de-sacs; 16,000 linear feet of sidewalk; and the Metra Commuter Train Station.

Key highlights of Barrington's award-winning snow and ice control program include:

- **Advanced Snow Removal Technologies:** Utilization of cutting-edge equipment to improve efficiency and effectiveness in snow removal.
- **Sustainable De-icing Practices:** Strategic use of de-icing and anti-icing materials, including chloride reduction initiatives that have cut rock salt usage by over 25% in just two years.
- **Proactive Snow Management:** A responsible approach to maintaining clear roads, walkways and transportation hubs, ensuring safety for residents, commuters and visitors.

- **Technological Advancements:** The introduction of GPS systems with turn-by-turn navigation for snowplow operators, improving both safety and efficiency while reducing fuel, overtime and material costs.
- **Real-time Weather Data:** Installation of two Road Weather Information Systems (RWIS), providing accurate pavement temperatures and road conditions to enhance decision-making before, during and after winter weather events.

Braun expressed gratitude for the honor, saying, "We are truly humbled to receive this recognition from the APWA. It serves as a testament to the dedication of our Public Works first responders, who work tirelessly to ensure our community's safety and accessibility throughout the winter season. I am incredibly proud of my team and grateful for the opportunity to lead a department at the forefront of embracing modern technology, sustainability and operational efficiency."

Village Manager Scott Anderson also celebrated the achievement, noting, "This award is a direct reflection of the hard work and commitment of our Public Works Department, especially during the challenging winter months. Our staff is dedicated to sustainable snow and ice management practices that prioritize safety while minimizing environmental impact. We remain focused on providing exceptional service to the community, no matter the season."

Village President Karen Darch further emphasized the importance of the award, stating, "This recognition, shared by only 10 other agencies in Illinois, underscores the Village of Barrington's commitment to excellence in public services. We are proud of our Public Works team and will continue to focus on safety, efficiency and sustainability in all our efforts, year-round."
