RE: Booster Pump No. 1 and No. 2 Inspections

Cook County Prevailing Wage Rates Included in Proposal

Dear Kevin,

Thank you for the opportunity to provide a cost proposal to pull and inspect booster pump No. 1 and No. 2 at the pumping station in Barrington, IL. Municipal Well and Pump (MWP) has extensive knowledge on pumping equipment throughout the Midwest. We are a trusted service provider for vertical turbine pumps, submersible pumps, split-case horizontal pumps, and centrifugal pumps. Well rehabilitation is another strong suit of Municipal Well and Pump.

For this project, MWP will mobilize a pump crew with service truck, stinger crane, flatbed trailer, and appropriate tooling to disconnect and remove the booster pumps from service.

The project will be performed in the following steps:

- Load equipment and mobilize to the Village of Barrington, IL Pump Station location.
- Survey and set up the jobsite.
- Remove booster pump no. 1 for inspection of pump components.
    - Bowl Assembly to be brought back for inspection in shop, if needed.
- Inspect the pump components for booster pump no. 1.
- Report for recommended repairs to follow.
    - No repairs will be completed until authorization has been made by the Village of Barrington.
- Once repaired equipment is completed, MWP will mobilize back to the jobsite for installation of booster pump no. 1.
- Booster pump no. 1 to remain in service to ensure proper operation prior to pulling booster pump no. 2.
- Repeat the steps for booster pump no. 2.
- Clean up site jobsite.
- Demobilize back to MWP.
